- As usual, pushing deer is not necessary but really helpful
- Khmer farm bonus is the key of this Build Order
- Don't forget to click up immediately to Castle Age when you reach Feudal Age since there are no buildings restrictions

## Feudal Age

Click up to Castle Age straight when you get to Feudal (remember that Khmer civ needs no buildings)

Build farms everytime you have extra wood to afford a farm

Build 2 stables while advancing to Castle Age (You can also sneak a villager near enemy base to do this)

In case that you decided to sneak a villager, you can also do 1 stable and 1 siege workshop, so you can produce elephants and Scorpions/Mangonels
